Paris comes to Burlingame

GUINOT - Paris started in 1963 when René Guinot set up his lab and designed the **first** skincare device that used a galvanic current, which defined the procedure we know and love today called the Hydradermie, our STAR facial. The famous George V. Hotel spa started offering its VIP clients this unique treatment which soon became Guinot's prestigious signature.

With 1,680 Guinot spas in France Guinot, IS the undisputed leader with over 50 percent of the market share.

Unlike other cosmetics that educate consumers through advertising, GUINOT advocates the “**prescription cosmetic**” since a beauty product has to be seriously designed and should therefore be seriously prescribed, by a beauty professional and Guinot expert: Sarah Jane.

Beauty products provide satisfaction only when they meet your expectations.

In 1986 a partnership with The Cochin Hospital in Paris resulted in the development of the legendary “Cellular Life Complex” that we all know and love as LONGUE VIE CELLULAIRE. The efficacy of this complex contributed to Guinot's reputation as a leader in the industry.

How well do you know your beauty therapist Sarah Jane?

Q: Sarah grew up in the depths of the English countryside (in glorious Sussex), and qualified as a City and Guilds of London Beauty therapist. After 2 years, Sarah was an expert massage therapist, manicurist, esthetician and.....?

A: Electrologist.

Q: Sarah went to Paris last year, not just to see her family, but because she had been invited to.....?

A: Meet with the international trainer for Guinot on prestigious Rue de la Paix.

Q: Sarah has worked at one of Condé Nast's top spas in the world. Can you name that spas location?

A: The tiny British colony of Bermuda.

Q: Sarah is passionate about her career and her holistic approach to skincare. Which aromatherapy oil does she recommend to her clients the most?

A: The essential oil of lavender, recommended to heal blemishes, cuts, burns and bites...

Are you fully protected?

Did you know?

- An SPF rating is only its UVB protection value
- GUINOT sunscreen has reinforced UVA protection
- 80 percent of facial ageing is caused by the sun
- GUINOT added DNA to sunscreen to absorb UV rays instead of your cells DNA thus your beauty is preserved
- Using SPF15 daily for the first 18 years of life reduces skin cancer risk by 80 percent
- GUINOT enriched its protection system with sun-reflecting pigments that act on all UV wavelengths
- SPF30 is the only true total block. Anything rated higher can be misleading and is illegal.

The DAILY addition

On the **Advanced Beauty Care** face book fan page we discuss daily health and beauty tips, interesting links, share recipes and so much more.

We recently discussed the essential oil of **TEA-TREE**, (named after British sailors in Australia whom added its spicy leaves to their bland tea). It's precious oil has many health and beauty benefits;

Did you know that any inflammation in the throat usually means that an infection is trying to enter the body?

To help your body fight it off add 1 drop of pure tea-tree oil to a glass of water and *gargle*. You can also use the pure oil of sandalwood or lavender for the same effect.

Last week our **DAILY ADDITION** included tips from Andrew Weil, M.D. whom came to Burlingame for the annual Mills-Peninsula Women's Luncheon. His talk addressed **HEALTHY AGEING** and how we can age with grace and delay the onset of age-related disease and discomfort. He also shared his solutions for optimum health.

Did you know that eating colorful berries can help stave off wrinkles? Raspberries, strawberries and cranberries contain a key antioxidant 'ellagic acid' that research has shown prevents collagen destruction and can moderate the inflammatory response.

Beauté Neuve Renewing Facial

Why choose this facial treatment?

Tiredness, stress or natural ageing cause the superficial layers of the epidermis to dry and become congested resulting in a loss of radiance.

How does it work?

Using fruit acids, the treatment begins with the 'Peel-In-Gel' that separates the dead skin cells from the living cells, followed by the 'Peel-Out' foam that exfoliates the skin to eliminate dead cells and thus stimulating cellular renewal.

What are the results?

Revealing a layer of healthy new cells, through its double peeling function your skin looks clear, feels smooth with restored radiance and beauty. The peel can be applied during your Hydradermie Facial to boost radiance.
